

AS-1000 Gaps Sealer

AS-1110 All Purpose Gaps Sealer

ALSEAL Gaps Sealer is an economical and low VOC compliant acrylic sealant designed for general caulking and sealing tasks. It's paintable and adheres well to most porous surfaces. The formulation allows it to withstand pressure during installation and remains flexible even with slight movements or vibrations, unlike conventional fillers which can become brittle and fail. The sealant can be applied smoothly and cleaned with water.

Applications:

It's widely used for applications like door and window joints, cabinet and wardrobe installation, and wood flooring skirting. This sealant works well with various substrates including metal, PVC, wood, concrete, gypsum boards, reinforced cement boards, and marble.

Approvals / Specifications:

- ▶ ASTM C920, Type S, Grade NS, Class 12.5, Use NT, M
- ▶ Good Environmental Choice Australia (GECA) certified
- ▶ Low VOC - USEPA Method 24 and SCAQMD Method 304-91 under SCAQMD Rule 1168

Available colour: White

AS-1000

AS-1110

Features:

- ✓ ±12.5 % movement capability
- ✓ Paintable
- ✓ Economical
- ✓ Versatile & permanently flexible
- ✓ Easy clean up with water
